# Module one: Understanding speaking – key terms and issues

## Overview

The aim of this module is to explore key terms and issues in the teaching of speaking. You'll look at how to evaluate and modify activities in terms of communicative quality, and consider how to get your learners using 'real speaking', not just completing grammar tasks.

## Can you now ...?

- recognise issues related to accuracy and fluency in speaking practice?
- distinguish between oral activities which practise grammar and oral activities which are communicative?
- evaluate a range of speaking activities?
- modify activities so they develop oral communication skills more effectively?

Show how confident you feel now about developing learners' speaking skills by putting a mark on the cline. You can return to these objectives and move your mark as you learn and make changes to your teaching.

Not confident

Very confident

Consider the development of learners' speaking skills. What happens where you teach? How does that affect you and your learners? How do you feel about it?

What would you like to happen? Which aspects of speaking do your learners need to improve? What skills or knowledge might they need?

# What are you going to change?

Now plan to change your teaching. Starting with a SMART goal will help you make the change and better understand the impact it makes.

A SMART goal is:

- **S**pecific (What exactly do you want to achieve?)
- **M**easurable (How will you know if it happened and the difference it made?)
- **A**chievable (Is it challenging but possible?)
- **R**elevant (Does it help you and your learners?)
- **T**imebound (When will you do it?)

Look back through this workbook and think about your learners. Choose one thing you'd like to be different about your teaching or classroom experience. Write it as a SMART goal.

Something I'd like to be different in my classroom or teaching is ...

A change I can make that will help achieve that is ...

I will need ...

Some challenges might be ...

To solve those challenges, I could ...

# What have you learned from making a change?

Make the change you planned in the last section, then reflect upon it. Sharing your answers to the following questions will guide you through the reflective cycle on page four.

The change I made was ... When I made the change, my learners ...

After making the change, I felt ... My learners felt ...

Some good/bad things about the change were ... I know this because ...

I think things happened this way because ...

The main things I learned from making this change to my teaching are ...

In future I will ... I will develop the skills and knowledge I need by ...

# What can you do next?

Well done, you've made it to the end of the course! We hope you've found it useful and you'll join us on another very soon.

By completing this workbook, you've also followed a reflective cycle (page four) – congratulations! You can use the reflective questions on page 12 to help you to reflect on and learn from other changes you make in your classroom. We hope you will continue to do this and share your experiences, insights and questions with other teachers in your school or community of practice (for example our Courses for teachers community).
